

See how the latest innovations can enhance your design and maintenance strategy in 2017.

Belzona Facilitates Maintenance Workshop

25th May 2017 – 10:00-16:00

Format and topics

The agenda is split into four sessions. Each session includes a presentation, discussion and a practical demonstration where visitors will get a chance to see Belzona solutions in action. [Click here](#) to learn more about the event or visit our Youtube Channel, [BelzonaTV](#), to see highlights from our previous workshop.

Session 1: 10:10-11:20

Repair and Upgrading of Floors

Introducing the new-to-market material, [Belzona 4154](#). See how this multi-purpose concrete repair material can cost-effectively rebuild large areas of concrete and stonework damaged by impact, vibration, chemicals and environmental attack. In addition, our durable elastomers which are ideal for rebuilding and creating expansion joints will be revealed.

Session 2: 11:30-12:40

Reforming and Protective Materials for Walls and Ceilings

Learn how damaged vertical and overhead masonry surfaces can be repaired using [Belzona's lightweight materials](#) and understand the powerful nature of polymers which can be used to form a clear, water repellent barrier for external walls.

Session 3: 13:20-14:30

Liquid-Applied Roofing Systems

This session aims to tell you why the use of [liquid applied membranes](#) has become increasingly popular due to their waterproofing and weatherproofing properties. In addition, you will see for yourself just how simple an emergency roof repairs can be performed using Belzona materials.

Session 4: 14:40-15:50

Maintenance Solutions for Machinery and Equipment

See how precise rebuilding and alignment can be performed using fast and simple repair methods. From shafts and housings to shimming, 100% solids materials continue to offer a lasting solution. We will also demonstrate a quick action, leak sealing kit which allows you to instantly perform low pressure leak sealing repairs on-site.

LOCATION:
BELZONA HQ

Belzona Polymerics,
Claro road, Harrogate,
HG1 4DS

Facilities Maintenance Workshop

Belzona Polymerics HQ, HG1 4DS — 25th May — 10:00-16:00

Visit objectives

- See how the use of organic coatings, linings and paste-grade materials can reduce capital costs, maximise asset life and minimise operational expenditure.
- Find out more about the latest innovations in polymer technology and view case histories spanning several decades.
- Network, exchange best practices and partake in discussions with fellow industry professionals.

Who is going to attend?

The event is targeted at the key decision makers and industry professionals across the Facilities sector, this includes facilities managers and maintenance professionals.

RSVP

Register by contacting Rhiannon McIver at rmciver@belzona.com.

Please note that spaces are limited and early booking is recommended. If after registering you are unable to attend, we would appreciate it if you could let us know, so that the space could be offered to someone else.

Certificates of attendance

Each delegate will receive a pack containing related literature and a certificate confirming their participation in the workshop. Presentations and photos from the day will be emailed afterwards.

Additional information

There are no registration fees, the workshop is free to attend. Lunch and refreshments will be provided. Please advise us on any special dietary requirements. Belzona holds a number of well-attended industry workshops throughout the year. [Click here](#) or visit our Youtube Channel, [BelzonaTV](#), to see some highlights from our previous workshop.

Dynamic presentations

Interactive demonstrations
